

PERFORMANCE. RELIABILITY. SECURITY.

Christie Government Solutions

CHRISTIE®

YOUR PARTNER FOR **SECURE DISPLAY SOLUTIONS**

From briefing centers and control rooms to mission critical war rooms, you need high-performing AV technology for secure, trusted display solutions.

As a U.S.-based AV display manufacturer with a global presence, we offer an extensive range of display and processing products to create custom solutions that are both secure and TAA-compliant.

Our teams of dedicated AV professionals are at your service, ready to deploy to wherever your Christie display solution is stationed.

From the initial design and procurement process through installation, ongoing service and support, we're driven to deliver the best products and best visual experience possible.

PROUDLY
BASED IN THE
USA

Innovative, secure ProAV solutions for government

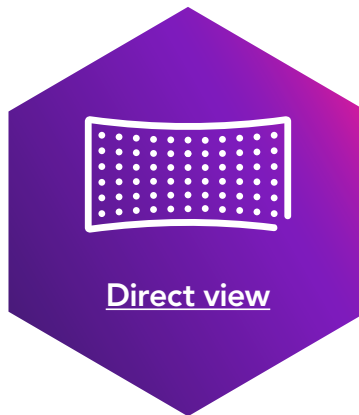

We're proud to be one of the few manufacturers that offer secure display solutions for a wide variety of applications to all levels of government and government agencies.

We back all our products with industry-leading warranties, comprehensive professional services and support, and leasing programs — giving you the ultimate peace of mind.

Projection

- 1DLP
- 3DLP
- DLP Cinema® projection

Direct view

- LED video walls
- LCD displays

Image processing

- Image processors
- AV distributors and switchers

Christie® Professional Services for government:

- Trusted expertise from Christie-certified professionals
- Responsive global support — we deploy where and when you need us
- Tailored services for mission-critical and secure environments
- Extended equipment performance and investment protection

PROJECTION SYSTEMS

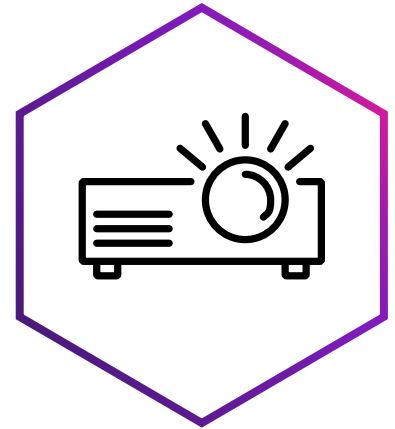

From the smallest briefing rooms to the largest training environments, there's a Christie® projector that's right for your application and budget. We offer secure, TAA-compliant 1DLP, 3DLP, and DLP Cinema® laser projectors in a range of resolutions and brightness levels to deliver exceptional image quality, brightness, and versatility.

1DLP projection

Powered by advanced, high-efficiency pixel DMD technology, our 1DLP laser projectors deliver exceptional image quality for a wide range of government applications, combining crisp 4K clarity, high contrast, and brightness options up to 24,750 lumens. Compact, lightweight designs maximize installation flexibility in space-constrained environments, while integrated warping and blending simplify deployment of seamless multi-projector arrays. Engineered for continuous, long-life, energy efficient operation, these low-maintenance projectors deliver dependable performance and are backed by a five-year or 20,000-hour warranty.

3DLP RGB pure laser projection

Designed for large-format mission-critical and visualization applications, our range of high-brightness 3DLP projectors delivers native 4K resolution with up to 50,000 lumens for large screens and high ambient-light environments. RGB pure laser illumination produces outstanding contrast and true-to-life color for consistent image fidelity that supports confident decision-making. High frame rate capabilities reduce or eliminate motion blur and judder, resulting in sharper and more realistic dynamic imagery. Engineered for continuous-duty, long-life, energy-efficient operation, these high-performance projectors support any-angle orientation, have integrated warping and blending, and provide comprehensive built-in connectivity with multiple 12G-SDI, HDMI, and DisplayPort inputs.

DLP Cinema projection

For over 65 years, we've manufactured world-class cinema projectors and revolutionized the cinema industry as a pioneer in digital cinema projection. Today, in addition to more than 60,000 theaters worldwide, you'll find Christie DCI-compliant cinema laser projectors in military base theatres, along with embassy and diplomatic locations worldwide, where people of all levels of government enjoy the same high-quality movie experience that civilians find at the movies.

CUSTOMER STORY: **ENGAGING PROSPECTIVE STUDENTS**

ANNAPOLIS, MARYLAND – In the Naval Academy Athletic Association's (NAAA) Ron Terwilliger '63 Center for Student-Athletes includes the Akerson Theater, a 180-degree immersive theatre designed to help inform visitors, prospective midshipmen, and their families about opportunities at the school.

Originally conceived as a visitors' center, the project evolved into a space that highlights the tradition and history of what it means to be a midshipman student-athlete. NAAA engaged Dimensional Innovations to design, integrate, and provide content for the Center and the Akerson Theater using a Christie® solution that includes HS Series projectors, Spyder multi-windowing processor, and Mystique™ automated camera-based alignment and recalibration solution.

DIRECT-VIEW SOLUTIONS

We offer trusted, secure, TAA-compliant visual display technology and engineering expertise to successfully implement the most advanced video wall installations. Whether it's information sharing or mission-critical control rooms, we can help tailor a solution that delivers unmatched visual performance.

LCD panels

Secure Series III

Engineered to meet the unique demands of the highest security environments, [Secure Series III LCD panels](#) are purpose-built for environments where data protection, operational reliability, and continuous performance are non-negotiable.

These 4K UHD LCD panels are TAA- and NDAA-compliant and designed specifically for control rooms, situation rooms, training centers, and mobile command units, featuring hardened security architecture, professional-grade performance, and true 24/7 operation.

LED video walls

When your installation calls for a high-performance solution, Christie® LED video walls deliver results that stand out from the crowd.

Designed and built in North America and powered by our advanced [VividLife™ LED video processing platform](#), these displays deliver lifelike color accuracy, precise display uniformity, and flicker-free visuals you can depend on.

MicroTiles LED

Our premium [Christie MicroTiles® LED](#) video walls let you create custom LED display solutions with unparalleled color and contrast in a range of ultra-fine pixel pitches. With 4K at 120 Hz, HDR10, and 24-bit color, MicroTiles LED delivers stunning, lifelike visuals with incredible color accuracy.

XP Series LED

[Christie XP Series LED](#) displays are engineered for exceptional performance at any brightness level and feature precise color accuracy and outstanding grayscale fidelity that's ideal for mission-critical control rooms, simulation, and training.

CUSTOMER STORY: **CONMY HALL**

The historic Conmy Hall, a 35,000-square-foot space in Washington, DC, features a state-of-the-art 144' LED video wall used during ceremonies and presentations hosted by the U.S. Army and the White House.

The historic Conmy Hall, a 35,000-square-foot indoor space located in Washington, DC, is used by the U.S. Army, the White House, and the Department of Defense to host important ceremonies and presentations.

The key component of Conmy Hall's AV solution is a state-of-the-art 144' video wall. The 12,000,000-pixel wall required the most sophisticated imaging technology on the market, including a Christie Spyder X80 multi-window processor.

The expansive LED wall required a 25' automated pull-out entryway to be built directly into it, creating a retractable doorway that opens with the push of a button. The result is a truly extraordinary seamless video wall that spans the width of the venue and offers optimal viewing from every seat in the hall.

POWERFUL PROCESSING

Get the most out of your Christie® display solution by combining it with our powerful image and video processing technology, designed to help you create a customized, integrated AV solution.

- Command and control centers
- Briefing centers and boardrooms
- Tactical operation centers

Spyder-S Series

Its unmatched versatility gives you the flexibility to scale from a single compact frame to as many as 16, supporting more than 200 million pixels on a single canvas without changing software or workflow. With expanded connectivity and simplified management, you can deliver more complex content with greater efficiency and confidence.

Terra

Christie Terra® SDVoE (Software Defined Video over Ethernet) solutions include everything you need for direct integration with our range of 1DLP and 3DLP projectors, XP Series LED, and MicroTiles® LED with uncompressed, zero-frame latency, artifact-free content over 10G networks.

[Spyder-S Series](#) can
empower your
control room.

SERVICE AND SUPPORT YOU CAN COUNT ON

When you choose Christie display solutions, you're backed by nearly a century of AV expertise, as well as industry-leading warranties, service, and support. We don't just stand behind our solutions, we stand beside you, every step of the way.

From design and deployment to installation and routine maintenance, our service experts act as an extension of our AV personnel – keeping your systems running, your teams connected, and your mission on track.

Experience unwavering support

We understand that in mission-critical environments, downtime isn't an option, and there's no such thing as a one-size-fits-all solution for government customers. We're here to help customize our support and help you complete your mission. Discover ChristieCare — flexible support built for nonstop performance.

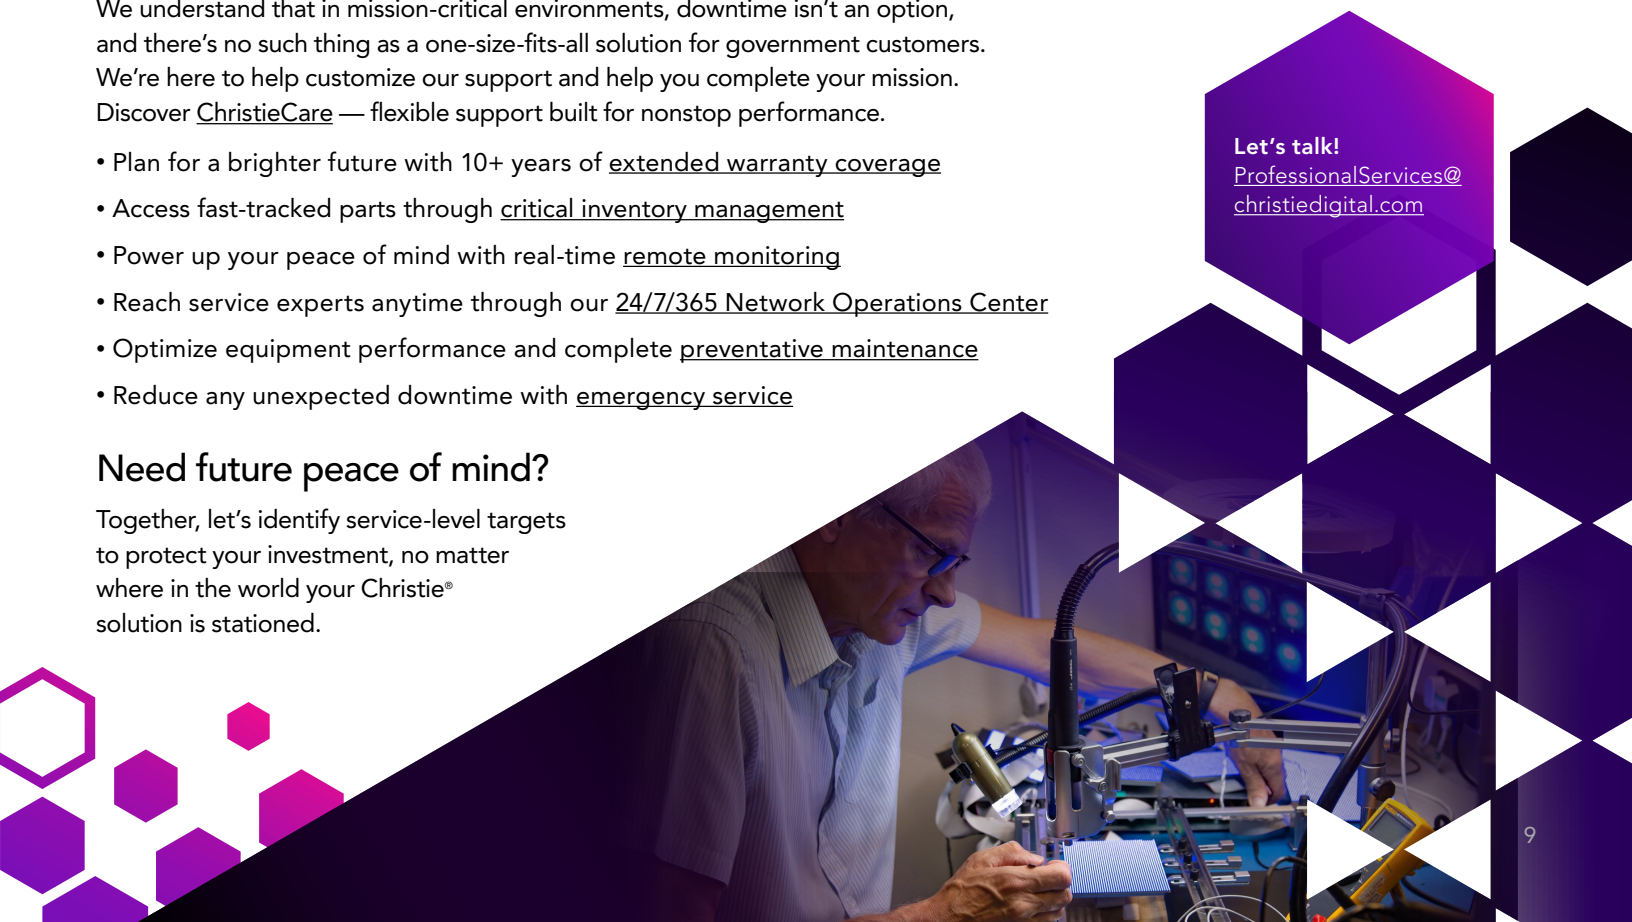

- Plan for a brighter future with 10+ years of extended warranty coverage
- Access fast-tracked parts through critical inventory management
- Power up your peace of mind with real-time remote monitoring
- Reach service experts anytime through our 24/7/365 Network Operations Center
- Optimize equipment performance and complete preventative maintenance
- Reduce any unexpected downtime with emergency service

Need future peace of mind?

Together, let's identify service-level targets to protect your investment, no matter where in the world your Christie® solution is stationed.
